

FORSTHOFF TOOLS

The Best Choice in Hot Air Tools

Hot Air Welders

THE QUICK-SE HOT AIR TOOL

The versatile Quick-SE is a light, handy, tried and tested hot air welding tool.

Ergonomic Handle Design: A tapered handle for ease of handling and use.

FEATURES OF THE QUICK-SE:

- Well balanced motor to prevent vibration
- Overall light weight — 2 lbs, 10 oz
- Broad line of easily installed nozzles that are compatible with similar tools
- Large air intake to keep tool cool
- Replace brushes from outside the tool — no need to disassemble
- Easily replaced power cord should it become damaged
- Generates its own air with built-in blower and motor
- Electronic variable temperature control up to 1290°F (700°C)
- 12-month warranty on parts and workmanship (excluding the element and brushes)
- Snug fitting ceramic element to prolong element life
- Small handle for ease of use — ergonomically designed to make the job easier

| Specifications | |
|------------------|--|
| Voltage | 120 V, 50/60 Hz AC or 230 V, 50/60 Hz |
| Heating Capacity | 1600 Watts, 120V (1500 Watts, 230V) |
| Pressure | 28 mbar |
| Temperature | 68 – 1290°F (20 – 700°C) infinitely variable |
| Weight | 2 lbs, 10 oz |
| Cable | 9 feet, 8 inches |
| Dimensions | 12¼" long, 2" to 2¼" at base handle grip |
| Marked | |
| Double Insulated | |

| Model# | |
|------------------|-----------------------------------|
| F0151S | Quick-SE 1600W 120 V |
| F0155S | Quick-SE 1500W 230 V |
| F0154S | Quick-SE 1300W 120 V |
| Heating Elements | |
| F2008 | Heating Element (1300 watts) |
| F2011 | Heating Element (1600 watts) |
| F2007 | Heating Element (1500 watts 230V) |

FORSTHOFF tools

for quality and reliability... at a reasonable price.

THE OVAL-Q HOT AIR TOOL

This powerful new welder is equipped with a double turbine system to produce maximum hot air flow for your industrial welding needs. Utilizing an ergonomic oval handle design, the Oval-Q welder includes the same high quality, reliable German-made parts and workmanship as the Quick-SE welder.

The NEW Oval-Q welder has a slight oval shape that allows you to work ergonomically.

APPLICATIONS:

- Roof seam welding
- Flooring installations
- Repairing and making truck tarpaulins and awnings
- Overlap welding of vinyls and coated fabrics
- Tank construction
- Heating thermoplastics for forming and bending
- Drying
- Installing pool liners, roofing and flooring
- Automotive manufacturing processes
- Shrinking tubing, molded parts, sleeves, etc.
- Defrosting and warming
- Activating adhesives
- Plastic fabrication

| Specifications | |
|--------------------|--|
| Air Output | 240 L/min |
| Heating Capacity | 1650 Watts, 120V (1500 Watts, 230V) |
| Noise level | <70 dB |
| Output Temperature | ≤ 1290°F (700°C) |
| Weight | 3 lbs |
| Marked | |
| Double Insulated | <input type="checkbox"/> |

| Model# | |
|----------------|-------------------------------------|
| F01560V | Oval-Q (Electronic), 1650W 120 V |
| F01550V | Oval-Q (Electronic), 1500W 230 V |

| Heating Elements | |
|------------------|--------------------------------------|
| F2009 | Heating Element (1650 watts) |
| F2007 | Heating Element (1500 watts 230V) |

You can quickly and easily clean the air filters by a simple separation from the handgrip to ensure maximum airflow and proper tool function.

MINI-ELECTRONIC

Compact, Lightweight Hot Air Welder

Ideal for plastic fabricators and tank manufacturers because of its light weight and ease of use. The totally insulated Mini-Electronic hot air welder has a heating capacity of 1300 Watts, 120 V. The heat is infinitely variable from 68 to 1290°F and is kept constant electronically. The required air supply can be provided by a compressor or shop air. An additional control regulates the air supply. For building sites and outdoors, a hand transportable blower, model F0997, will supply the necessary air.

This unit is particularly useful in welding plastic sheeting, pipes, fittings and tank fabrication because of its easy-to-handle size.

Push-on welding tips work with the 5mm nozzle.

The M10 adaptor nozzle with threads enables screw-on welding tips to be used in welding operations.

Please see accessories on page 4.

When used with compressed air source, air regulator and filter recommended.

| Specifications | |
|------------------|-----------------------------------|
| Voltage | 120V, 50/60 Hz 230V |
| Heating capacity | 1300 Watts 120V - 1500 Watts 230V |
| Temperature | 68 – 1290°F infinitely variable |
| Air requirements | 80 – 250 liters/min. (3 - 5 psi) |
| Hose Length | 9 ft. |
| Marks | CE |

Mini-Electronic Plastic Welding Kit

F1023KP Mini-E Weld Kit, includes:

- F10230997 MINI-electronic 120V 1300W
- F4000 Nozzle 5mm, round adaptor nozzle
- F5010 3mm, round Push-on Speed Welding Nozzle
- F5011 4mm, round Push-on Speed Welding Nozzle
- F5012 5mm, round Push-on Speed Welding Tip
- F5015 Push-on Tacking tip
- BTBOX Toolbox for Welding Kit

QUICK-L NON-ELECTRONIC HOT AIR TOOL

These low-cost tools are specially designed for tarpaulin, tent, awning fabricators and automotive upholsterers who weld one type of material in one overlap width. This tool features your choice of one or two permanent heat settings and one cool setting for cooling the unit after use. It is easy to use with its ergonomic design and constant heat for the job at hand.

When necessary, its brushes are easily replaced without disassembling the tool.

| Specifications | |
|------------------|--|
| Double insulated | <input type="checkbox"/> |
| Voltage | 120 V, 50/60 Hz |
| Temperature | Selectable in 1 or 2 permanent heat settings |
| Weight | 2 lbs, 10 oz |

Please see page 4 for additional accessories.

GRAND-SE HOT AIR TOOL & HOT AIR SE

The powerful hot air blowers for trade and industry

- This hot air blower can be hand held or built into a machine for continuous operation.
- For use wherever hot air is needed for warming, heating, forming, shrinking or activation.
- Air flow rate of 450 liter/minute depending on the nozzle used.
- Brushes are easily changed from the outside without opening the tool.
- For the painting and decorating industry, the wide slot push-on nozzle removes old paint and varnish easily.

| Specifications | |
|------------------|---|
| Double Insulated | <input type="checkbox"/> |

Handheld Hot Air Tools

THE TUBE-G HOT AIR TOOL

With tube handle design and double turbine system for even more hot air flow. Using the same high quality reliable German-made parts as the Grand-SE, the Tube-G-Electronic offers you a traditional tubular handle design with a powerful 600 L/min air output.

APPLICATIONS

- Roof seam welding
- Flooring installations
- Repairing and making truck tarpaulins and awnings
- Overlap welding of vinyls and coated fabrics
- Tank construction
- Heating thermoplastics for forming and bending
- Drying
- Installing pool liners, roofing and flooring
- Automotive manufacturing processes
- Shrinking tubing, molded parts, sleeves, etc.
- Defrosting and warming
- Activating adhesives

VENTO-G (BRUSHLESS)

The efficient brushless hot air fan with a service-friendly motor and a strong air output of 480 litres/minute

The hot air tool, Vento-G, with brushless motor is used for for in-line or off-line applications such as warming, heating, molding, shrinking and heat activation. The Vento-G allows a high-performance permanent use in industrial processes, machines and systems without maintenance of the motor. With consequential optimization of the active core elements of the motor and the use of modern individual cog winding, the power density is considerably increased in comparison to standard brushless motors.

- Plastics fitters
- Tank construction
- Manufacture of ventilation pipes
- Sealing
- Mechanical engineering
- Conveyors and materials handling technology
- Packaging industry
- Wine and spirits bottling plants
- Painting and decorating industry
- Printing and label industry
- Automotive industry

| Specifications | |
|----------------------|--|
| F1043V | Vento-G Brushless hot air tool |
| Voltage | 230V, 50/60Hz |
| Power | 230V 3000 W or 3400 W |
| Output temperature | 68 – 1290°F (20 – 700°C) infinitely variable |
| Noise emission level | <70dB |
| Protection class | II/□ (double insulated) |
| Weight | 1.5kg with mains connection lead |

TYPE 3000E HOT AIR TOOLS

Modern hot air tools for numerous applications...

- Electronically controlled infinite heat settings in 230V AC or 380V
- Heating capacity 3000 W for a maximum temperature of 700°C (1290°F)
- Requires external air supply
- Suitable for continuous duty
- Used on conveying systems, in machines, in heating ducts and in various apparatus
- Push-on nozzles available for various applications

TYPE 7500 HOT AIR TOOL

The "flagship" of our hot air tools

- Suitable for installation in machines, heating ducts, on conveyor lines, or in apparatus because of its robust and compact design
- Heating capacity electronically controlled and infinitely variable
- Available in 5000-Watt or 7500-Watt version— also available without electronics
- Maximum temperature 700°C (1290°F)
- Operates with external air supply
- Virtually no maintenance
- Suitable for continuous duty
- Wide slot nozzles up to 300mm are available to adapt the air flow to the individual application

| Specifications | |
|------------------|---|
| Voltage | 230-240 V 380-440 V |
| Single Phase | |

Automatic Overlap Welders

FORSTHOFF-DB

AUTOMATIC 50MM TAPE WELDING MACHINE

The FORSTHOFF-DB automatic welding machine is a very powerful device for the welding of 50mm vinyl tapes.

The automatic hot air welding machine provides a heat output of 4000 W, 230 VAC, which is continuously adjustable (electronically) up to 700°C. The drive unit is equipped with a strong motor and a heavy housing, which guarantees a speedy drive and a strong contact pressure. The device starts automatically after the welding head pivots.

In addition, the housing of the automatic welding machine is bedded through a three-point bearing, which compensates for small unevenness of the welding base. It is supported by the weight of the FORSTHOFF-DB automatic welding machine, which is integrated in the housing of the automatic welding machine.

The FORSTHOFF-DB reliably welds tapes with a width of 50 mm. The strong hot air fan in the FORSTHOFF Tube design produces air power of 600 l/min. The heat shield enhances the unwinding unit of the FORSTHOFF-DB automatic welding machine and prevents heating and deformation of the tape reel.

Specifications:

| | |
|--------------|--|
| Voltage: | 230 V, 50/60 Hz, 4000 Watts |
| Temperature: | 20° - 700°C infinitely variable |

FORSTHOFF-P2

the **COMPACT** AUTOMATIC WELDING MACHINE

The durable FORSTHOFF-P2 has been put to effective use in the tent, tarpaulin, advertising banner and industrial fabrics industries for over **25 years**.

The experience gained and the enhancements made to the Forplast-P are reflected in the new FORSTHOFF-P2. The FORSTHOFF-P2 offers innovative features such as:

- Available in 120V or 230V power.
- 120V unit uses convenient 20 Amp “household” power.
- Lightweight, 38 lbs. Extra weights available for welding thicker material.
- Easy to maneuver. Caster/Roller design allows for easy mobility and cuts down on wrinkles!
- Narrow and maneuverable for crease-free welding.
- Telescopic guide handle that can be conveniently adjusted to the user's body height.
- A new generation of nozzles for faster welding at up to 11m/min for 20mm overlap welds.
- Modern generation of gear motors providing a speedy and powerful drive for the welder.

The new FORSTHOFF-P2 is a universal welder and is available in three selectable basic models for 20, 30, or 40mm overlap welding. In addition, the FORSTHOFF-P2 is easy to convert to an alternative overlap width for seam welding, webbing welding and wetting ropes or cords.

P2 Roofing Welder w/Case & Weights
